

Checkpoint 0: Project proposal

Activity: Checkpoint 0: Project proposal

Course: 2526 Natural Computing (KW3 V)

Name: Robert Blaauwendraad

Problem statement	Insufficient	Sufficient	Good	Excellent
Problem scope and relevance (scientifically)	Project does not make sense or just repeats assignments.	Project makes sense and has some minor novel elements. ✓	Project makes sense , adds substantially to existing work.	Project is interesting novel, embedded in literature, ambitious.
Definition of problem / question	Problem statement is absent, vague, or its relevance is unclear. ✓	Problem statement is adequate in terms of direction but could be more specific in what exact problem is being solved and why.	Problem statement is clear and specific.	Problem statement is clear and specific, and its relevance to the field is very clearly demonstrated.

Criterion Feedback

The main lack is the unclear justification for this study. Some questions that might help the brainstorming are: What is the aim of comparing those three methods? Why it can be of interest? What do you expect to unveil?

Review of related work	Related work is not discussed, not relevant to the project, or lacks important elements.	Review describes at least 3 related works that are each relevant to the project. ✓	Describes relevant related works and their limitations/connections to the project.	Comprehensively describes related works. Limitations and connections to the current work are completely clear.
------------------------	--	--	--	--

Methodology and experimental design	Insufficient	Sufficient	Good	Excellent
Approach seems appropriate? (Note: this provides no guarantees for the assessment of the final report, just a first impression)	Approach is not suitable to address goals, flawed or lacks justification.	The approach seems adequate; perhaps still with some flaws that can be addressed ✓	Good methodology which may have only minor flaws and is well-justified.	Good methodology that is very well justified and has (almost) no flaws.
Scope of methodological work (Note: this provides no guarantees for the assessment of the final report, just a first impression)	Approach seems too similar to assignments or existing code without further exploration; this may not be enough work for a project. ✓	Approach allows for sufficient exploration of the method and/or experiments.	Proposed methods and exps are extensive with minor flaws, or of high quality.	Proposal suggests extensively developed methods and/or high-quality experiments.

Criterion Feedback

Methodology and experimental design	Insufficient	Sufficient	Good	Excellent
This item aligns also with the problem statement. The proposal, in the current form does not make clear what is the added value of your proposed approach nor the justification for it.				
(*) Correctness & understanding of the described methods in the proposal.	Significant factual errors reveal insufficient understanding of the subject matter.	Explanations show basic grasp of the methodologies and use cases, but may have minor flaws.	Explanations show a solid grasp of the methodology and its use cases. ✓	The explanations show an in-depth understanding of the subject matter.
Feasibility (Note: this provides no guarantees for the assessment of the final report, just a first impression)	The project seems infeasible	The project may be feasible but there are many open questions and unaddressed risks. ✓	The project is probably feasible, with some ideas on risk mitigation but they may still be somewhat vague.	The project is feasible and contains concrete ideas on risk mitigation.
Analysis of results	Insufficient	Sufficient	Good	Excellent
Proposed analysis / evaluation (Note: this provides no guarantees for the assessment of the final report, just a first impression)	There is no detail on analysis/evaluation	A basic plan for evaluation/analysis is proposed, but there is room for further exploration. ✓	The proposal has a solid plan for analysis/evaluation.	The proposal has a solid plan for analysis/evaluation that is well justified.
Written text	Insufficient	Sufficient	Good	Excellent
Writing style, conciseness (not important for the assessment of your proposal, but may be useful writing your report)	Includes excessive irrelevant details and/or difficult sentences making it difficult to read.	Understandable, but could be improved in style and conciseness; May have some unclear statements but the gist is clear.	Mostly clearly written. There may be some room for trimming some unnecessary details but this does not hamper understanding. ✓	Well-written, balancing clarity, precision and conciseness without excessive or irrelevant content.

Overall Score

Good to go!

Overall solid proposal that is sufficiently feasible and concrete to start working on immediately.

Of course, please still have a look at the feedback to start your project and stay in touch with your supervisor in coming weeks.

A good start

Seems like a good project, but there may be some important points to consider or flesh out before you start. **Have a look at the feedback and contact the supervisor if you have questions on how to address them. Of course, you should remain in touch with the supervisor throughout the project.**

Needs more work

There are some key issues with the proposal that need to be addressed before you continue (for example, but not limited to, issues with the approach, plans not sufficiently concrete, feasibility, etc).

Please contact the supervisor asap to solve the problems and avoid delays.
